THE 9 STEP PROCESS TO MARKETING A NATURAL HEALTH PRODUCT

I want a product but what does this involve?

Follow the 9 Step Process:

1. Conceptualization.
2. Identification of suitable ingredients and packaging.
3. Formulation development.
4. Set quality standards for manufacturing and analytical testing.
5. Cost analysis
6. Product registration with Natural and Non-prescription Health Products Directorate (NNHPD, Canada). Assignment of Natural Product Number (NPN).
7. Manufacturing, packaging, and labelling of product under Good Manufacturing Practices.
8. Product analytical testing, at accredited analytical laboratories, and release for sale (Quality Control and Quality Assurance).
9. You now have a product for commercial or professional usage.

From nature to market product:

Rhodiola rosea plant

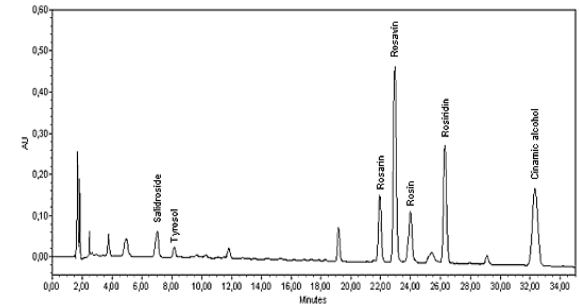

Rhodiola rosea Cut Root

Rhodiola rosea Root Powder

Rhodiola rosea Root HPLC Chromatogram

Encapsulated Finished Product

Tincture Finished Product
